# ABOUT THE ARAD

## HIGHLY & RELIABLE MODULAR BATTLE RIFLE

IWI ARAD Assault Rifle is designed for Infantry use, Special units and Law Enforcement units.

IWI ARAD is especially intended for all kinds of combat scenarios with its ability to change calibers.

IWI ARAD is equipped with a picatinny rail to enable the use of a variety of optics and other attachments. The picatinny rail is an integral part of the upper receiver of the rifle. In addition, M-LOK rails at the 3, 6 and 9 o'clock positions along the handguard. It includes a telescopic buttstock which allows the users to adjust the length individually for their particular needs.

The modular structure of the rifle enables the user to easily dismantle and replace the barrel. The weapon is fully ambidextrous with controls on both sides of the rifle.

IWI ARAD Assault Rifle is a short stroke gas piston operated, with a regulator which allows constant operation in all environmental conditions.
